

Are your disability aware?

Albion's Pathfinder barrier and merchandising post product range has safety at the forefront of its development. We ensure that our products are not just easy to use, aesthetically pleasing and value for money but also ensure that we assist our customers by adding health and safety features and adoptions to products to make them DDA compliant.. In line with the Disability Discrimination Act 1995

Making your café banners DDA compliant

- To ensure your barriers are visible to partially sighted pedestrians Albion offer vinyl stickers in a choice of contrasting colours to place on the upright posts. Stickers are 150mm in width and should be placed at least 1400mm above ground level in line with RNIB standards
- We also offer vinyl circular stickers for the bases ensuring they are not a trip hazard
- Green, white, grey and brown banners can be invisible to visually impaired people. Either choose a bold colour for your banner or Alternatively Albion can adapt the banner to hold a concealed loop along the base that holds a steel pole to make the banners appear a block colour.
- Go one step further and colour coordinate your post and base

NB:
Regulations differ between each local authority, please check with your council disabilities representatives to ensure full compliance

Built in features

- The café banner meets the 1100mm height regulations for street furniture
- Vertical posts are stainless steel and the correct height and diameter to be locatable by a white walking stick
- Posts have top caps in a choice of colours on request. Top caps can be made to custom colour to easily locate the posts for visually impaired pedestrians
- Lockable pole to post ensuring the structure is safe and taper proof
- Banners are fixed into place with bungee straps these are positioned the banner base is no higher than 100mm from ground level to ensure that guide dogs do not get trapped under the banners

What else should I know?

When setting out your café banner ensure there is adequate clearance on the pathway or footpath for pedestrians and wheelchair users. The clearance width should be a minimum of 1500mm. Obstructions should be no longer than 6metres in length.

Albion's café banners are 1340mm wide as standard. Albion can adjust the width of the café banner to your bespoke specification on request

Health and Safety Features

- Posts are just 13kg in weight. This is within the UK suggested maximum lighting weight at work for men and women.
- At request banners can be printed and supplied with a B1 and M1 fire resistant rating. These fire resistant finishes when applied restrict fire spread.

If you would like help in ensuring your banners are DDA and Health and Safety compliant then contact Albion on 01767 692313 option 1
